Disha Vani दिशा वाणी

A Marathi voice helpline that finds skill courses people can actually join.

Live disha-vani.onrender.com · **Code** github.com/varad567/disha-vani · **By** Varad Bidwai, MIT ADT University

THE PROBLEM

Skill schemes live on portals that expect you to read, type and decode eligibility rules.
Many of the people they are meant for would rather just talk, in Marathi.

HOW IT WORKS

1 Call
Tap once. Disha greets you in Marathi.

2 Talk
5 simple questions, in Marathi, Hindi or both.

3 Match
Checks each course's official entry rules.

4 Share
Hear the result, send the card on WhatsApp.

WHY IT'S DIFFERENT

Verified, not guessed
11 courses from the National Qualifications Register, with official codes and entry routes.

Honest answers
Not eligible yet? Disha says what you need, like "8th pass + ITI".

Fair by design
Family background can add options, never remove them. Enforced in code.

BUILT WITH GNANI AI

Prisma v3.0 hears every answer, code-mixed speech included

Timbre v3.0 speaks every reply in natural Marathi

Gemini phrases questions; Python runs the rules.

WHO IT'S FOR, AND WHAT'S NEXT

For rural and semi-urban youth in Maharashtra, and the block skill officers who follow up with them.

Next: a missed-call number for keypad phones, then a pilot with one block office.

11	3	~6 s	0
verified courses	languages understood	per spoken turn	options removed for family background

Synthetic callers only. Course data from nqr.gov.in
